## DETAILED ACTION

### *Allowable Subject Matter*

1. Claims 1,4-7,9,11,12,15-18 are allowed.
2. The following is an examiner's statement of reasons for allowance: The prior art cited does not anticipate individually nor teach in combination the following limitations:
  - An illuminating device comprising: a light source; and a light guide plate for introducing light of the light source from a side end face to an interior and emitting said light propagated in the interior from an emitting face opposing an illuminated body to illuminate said illuminated body, wherein a prism shape for reflecting the propagating light within the light guide plate and emitting the propagating light to said emitting face side is formed on the emitting face of said light guide plate, said prism shape is constructed by plural projecting stripes formed on said emitting face, and a slanting face portion is formed on an advancing direction side of said propagating light of said projecting stripe, and an inclination angle of said slanting face portion is set to 40° or more and 60° or less, wherein an angle formed between an advancing direction of the propagating light incident to said slanting face portion and an advancing direction of reflected light of the propagating light is an obtuse angle.
  - An illuminating device comprising: a light source; and a light guide plate for introducing light of the light source from a side end face to an interior and emitting said light propagated in the interior from an emitting face wherein a prism shape for reflecting the propagating light within the light guide plate and

emitting the propagating light to said emitting face side is formed on the emitting face of said light guide plate, and wherein said light source has a bar light guide body arranged along the side end face of said light guide plate, and also has a light emitting element arranged in an end face portion of the bar light guide body, said prism shape is constructed by plural projecting stripes formed on said emitting face, and a slanting face portion is formed on an advancing direction side of said propagating light of said projecting stripe, and an inclination angle of said slanting face portion is set to 40 degrees or more and 60 degrees or less, wherein an angle formed between an advancing direction of the propagating light incident to said slanting face portion and an advancing direction of reflected light of the propagating light is an obtuse angle.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
